Hi Rusty,

We corrected a label in the legend on this map of remediation parcels. Here is the revised version. I'm also copying others to keep folks in the loop.

We sent out access requests yesterday for properties along NW 6th Street and in Block I.

Thanks,
Greg

Subject: Updated Remediation Zone and Access Update

Hi Rusty,

As we discussed on Sept 26, we have updated the OU5 remediation zone map west of the Beazer property in the Stephen Foster neighborhood (attached). This map reflects the latest concentration data, including samples collected in July 2013.

Also, with some good work from Kate, we have now obtained survey & design access agreements for all those properties we have sought them from, with the exception of two – Mr. Geiersbach (A02) and Ms. O'Steen (C01).

Tomorrow, we are sending out access request letters for the properties along 6th Street and for the properties in Block I that we now need access for; these were previously "evaluation" parcels. Those access letters are on EPA letterhead, from you, and have the same wording as the ones sent in prior rounds with dates updated. We also changed the return-to address for the signed access agreement to be c/o Tetra Tech at our address, since we figured there may be logistical issues at the Federal Center during the current government shutdown. (Please let me know if that is a problem.)

Please let me know if you have any questions.

Thanks,

Greg
