Hi Fred

I did not see that you were copied on this.

It was important that EPA specifically constrain the assumptions used for the onsite risk assessment. In addition to addressing leaching to groundwater, these will be used to develop "site-specific" industrial/commercial cleanup target levels for the onsite areas.

EPA comments did address some of the critical (and inappropriate) assumptions that were my concern for finalizing the onsite soil remedies. Now we need to see how this is addressed in the FS.

Let me know if you have any questions.

Pat Cline

Subject: EPA Comments on Koppers On-Site Soil/Sediment Risk Assessment

Good morning, Mitchell,  
Attached are EPA's comments on the Koppers On-Site soil/sediment risk assessment. We look forward to working with you on resolution and appreciate all of your work at the Koppers Site.  
(See attached file: Scan001.PDF)
