VIA EMAIL

Rusty Kestle Remedial Project Manager Superfund Remedial Branch, Section C U.S. Environmental Protection Agency, Region 4 61 Forsyth Street SW Atlanta, GA 30303-8909

Subject: September 2015 Monthly Progress Report

Dear Mr. Kestle :

On behalf of Beazer East, Inc. (Beazer), attached is the September 2015 Monthly Progress Report for the Koppers portion of the Cabot/Koppers Superfund Site in Gainesville, Florida. If you have any questions or comments, please contact me.

Sincerely,

Gregory W. Council, P.E. Principal Engineer

Kelsey Helton, FDEP CC: Robin Hallbourg, ACEPD Agustin (Gus) Olmos, ACEPD Kristie Williams, City of Gainesville Yvette Carter, City of Gainesville Rick Hutton, GRU Carrie McCoy, Black & Veatch Josh Hayes, J.M. Waller John Herbert, GeoHydro Consultants Patricia Cline, Community Technical Advisor Linda Paul, Koppers, Inc. Mitchell Brourman, TRMI Mike Slenska, TRMI Donna Kopach, TRMI Jim Erickson, Tetra Tech Wayne Reiber, Cabot Corporation Steve Clark, FTS John Helton, FTS

September 2015 MONTHLY PROGRESS REPORT Cabot/Koppers Superfund Site Gainesville, Florida

1. Compliance Actions:

- Beazer's Operation and Maintenance (O&M) Contractor performed routine treatment plant O&M services for the groundwater extraction and pretreatment system.
- Remedial Design and Remedial Action activities are presently being conducted.

2. Sampling/Test Results and Data:

- Instantaneous flow rates and totalizer volumes were measured in each extraction well.
- Note that ISGS injections affect the NAPL recovery amounts presented below. See Section 3 and Tables 1 and 2.
- The bi-weekly passive NAPL recovery program continues at Upper Hawthorn monitoring wells: 0.6 gallons of NAPL were removed from Upper Hawthorn wells during the past month (2 recovery events). Note that no recovery was conducted at HG-11S and HD-15S due to the ISGS operations. A total of 598.71 gallons have been removed since the start of the NAPL recovery program on June 19, 2004. Table 1 provides details of the NAPL recovery volumes by well and date.
- In addition, NAPL was removed from the temporary injection point (TIP) installed in the Former Drip Track Area (Table 2). Two NAPL recovery events were conducted during the month, resulting in a total of 0.6 gallons removed. Note that NAPL was not collected from the remainder of the TIPs due to ISGS operations in the Former Process Area.
- NAPL was not removed from five Upper Hawthorn recovery wells installed in the Former Process Area as part of the ISGS program due to the active ISGS operations.
- A total of 3,659,990 gallons of groundwater were recovered by the Surficial Aquifer drains and extraction well system (both Surficial Aquifer and UFA) during the past month (system run time of 720 hours). The average recovery rate for the month was approximately 84.72 gallons per minute (gpm). The recovery for each component is listed below.
 - Surficial Aquifer
 - Perimeter Extraction Wells: 647,049 gallons
 - Former North Lagoon Drain: 445,850 gallons (estimated from 9/1-9/8/15)
 - Former Drip Track Drain: 505,270 gallons
 - Former Process Area Drain: 0 gallons (Inactive due to ISGS operations)
 - Former South Lagoon Drain: 415,080 gallons
 - Upper Floridan Extraction Wells
 - FW-6: 28,170 gallons
 - FW-21B: 167,908 gallons
 - FW-31BE: 951,990 gallons
 - FW-32BE: 498,673 gallons

Approximately 368.8 million gallons have been recovered from the Surficial Aquifer extraction wells and four drains since the start of the Surficial Aquifer containment system in January 1995.

For the month, the total volume of water treated and discharged to the GRU wastewater system was 2,015,000 gallons. The remaining portion of the water, from Upper Floridan Aquifer wells, was treated and used for on-Property irrigation.

The Former South Lagoon groundwater drain pumps were turned off for approximately 4 hours to pump and clean clarifiers and to treat backwash water. The Process Area pumps were turned off on July 13, 2015 at the start of the ISGS injection.

3. Plans, Reports, Deliverables and Procedures Completed:

- ISGS injection started on July 9, 2015 and were completed on September 23, 2015.
- Letter regarding "Field Test of Organoclay Addition to ISGS Injectate" was submitted September 15, 2015.
- Remedial Design/Remedial Action Status Update Meeting (EPA/Beazer) September 15, 2015.
- Design Track 2 pre-design investigation field tasks began September 28, 2015.
- Periodic maintenance checks and inspections.
- Treatment-plant component maintenance and repair as needed (caustic pump, carbon vessel gaskets and gauges, sludge pump diverter valve, bag filter vessel).
- Replaced translator on North Lagoon flow meter (was inoperable from Aug 27, 2015 to Sept 9, 2015).
- Irrigation Breakthrough and TSE sampling on Sept 9, 2015.
- Stormwater Sampling on Sept 16-17, 2015.
- On-property irrigation using treated groundwater from FW-6, FW-21B, FW-31BE, and FW-32BE.

4. Upcoming Actions:

- NAPL collection at Upper Hawthorn monitoring wells: bi-weekly, except in active ISGS areas.
- NAPL collection at temporary Upper Hawthorn ISGS injection points: bi-weekly, with modifications during ISGS injections.
- Routine inspection, operation, maintenance, and monitoring.
- Third quarter sampling event: November 30 December 4, 2015.

5. Schedule Status:

• The current remedial design schedule is attached.

6. Plan/Schedule Modifications:

• Minor modifications were made to the project schedule.

7. Community Involvement:

• Future community involvement activities will be coordinated with EPA.
