Mr. Popejoy,

I was informed by the city that the sign was in place and went to the site last evening to verify. I was able to verify that the same warning sign, used on the other streets, was posted at the end of NW 30 Avenue. I also stopped by Mrs. Sheets home to let her know and she was aware. Thanks

Mr. Popejoy,

I have had a recent conversation with Mrs. Sheets and informed her I would look into the possibility of getting a sign at the end of NW 30 Avenue. The Alachua County Health Department (ACHD) recommended to the City that an effective barrier be placed around the entire perimeter of the easement with warning signs. At this time an effective barrier is in place via the installation of a fence where access to the easement was an issue. Metal warning signs were placed on this fence.

I recently went to the site to investigate Mrs. Sheets concerns and it would appear that a warning sign would be appropriate at the end of the street. I am meeting with the County and City to discuss further as John mentioned, there may be some potential issues with private fencing and esement boundries.

The front page of the ACHD website, <http://www.doh.state.fl.us/chdalachua/> , contains the most recent Health Department Update for the Stephen Foster Neighborhood and all the Health Consultations. It also contains a link to ACEPD interactive map with all the soil sample results. Please feel free to share this link.

The ACHD will be releasing the eighth Update for the Stephen Foster Neighborhood very soon. Do not hesitate to contact me if you have any questions. Thanks

Thanks, John.

I want to reiterate that I am personally concerned about the mental health of Ms. Sheets as she personally and publicly stated during our meeting. Although none of us are individually responsible for another adult's state of being, perhaps collectively we can help keep her stable into and through the remediation. "It takes a village..." I'm sure we'd all question ourselves if the worst came to be and we felt we hadn't done "all" we could do.

Can you tell me who manages the ACEPD website? I have taken over PGC's and am teaching myself WordPress. I'd like to link the ACEPD Koppers page to the PGC website. I think this could go a long way in helping the community stay informed.

Thanks again for your consideration and help with these matters.

Mr. Popejoy,

I will try going forward to keep the Neighborhood Assn through you abreast of onsite activities as we become aware of them. While I post all relevant documents on the Koppers on-line document library as we receive them, I know that sometimes it is difficult to understand all that is going on.

As far as Ms. Sheets sign issue, Anthony Dennis did bring this topic up in the Local Intergovernmental Team meeting Wednesday. It appears that there is an issue as to who owns the fence at the end of the street 30th ave and the exact boundaries of the easement and where it ends that may have impacted the signage that was placed at the end of the street. I will look into this issue and get with Anthony and the City again to see what can be done about it.

John

Dr. Mousa,

Last night, we had a Stephen Foster Neighborhood Association meeting. I was able to report on several aspects of Koppers including the search for buried drums. I have emailed to Robin Hallbourg the statements I made at that meeting.

It would have been helpful for keeping the community informed if PGC was in the loop re: onsite activities. I really want to work hard at heading off any negative community blow back that arises from lack of information. As an example, "Beazer paid those guys to NOT find any drums!" PGC can be very helpful in keeping the community comfortable that the efforts being made on and offsite are credible.

In addition, Sharon Sheets actually walked out of our meeting last night. She is obviously a nervous wreck [with good cause]. She states that she is on the verge of a nervous breakdown. From what I observed, I believe her. She trusts no one. A particular complaint she has regards signage. At the end of her street, 30th avenue, there is a NO TRESPASSING sign. But, there is no superfund, toxic site sign. She says that Anthony Dennis has promised to fix this. It still hasn't happened.

Can we get an appropriate INFORMATIONAL sign put up at the end of the 30th avenue? This small act could go a long way in helping keep Sharon from going over the deep end and begin rebuilding some trust.

Thanks for your efforts on behalf of our community and thanks for these little acts that can make huge differences down the road.
peacekp.
