Scott,

We just received an access agreement for J10. Jeff Rapolti will proceed to collect a composite sample at that property, with Josh Hayes overseeing. We will be getting the sample today to try and keep the same analysis schedule. If anyone wishes to view the sample locations, please email us immediately or call Jeff at 321-652-7644.

Thanks,
Greg

Subject: Supplemental Soil Sampling Tomorrow

Scott,

Ben Marshall plans to collect soil samples at properties J04 (AT&T) and J11 (corner of NW 21st Ave and NW 3rd Terr) tomorrow. We are sampling to determine the dioxin concentrations at these properties. Each sample will be from the upper 6 inches of soil and will be a composite of at least five locations spread throughout the property. We also plan to sample J10, but we do not have a signed access agreement yet.

Anyone wishing to view the sampling locations should coordinate directly with Ben by emailing him or calling him at 904-718-4529. Josh Hayes will be overseeing the sampling.

Thanks,
Greg
