Jim,
Yes, book it and install it.
Thank you,
Scott Miller

Thanks Scott, should I interpret you email to mean that you are good with the Beazer Team response to the GRU comments and that Beazer has final approved to proceed with installing FW-32BE. If so, I will move forward with contracting, scheduling and permitting. Once, I have a firm start date from driller, I will let you and other know the schedule. Thanks Jim

Jim,
Thank you. Your assumption related to formal changes to the workplan is correct.

Scott, attached is Beazer response to the GRU comments on the FW-32BE workplan. We do not agree with a number of the proposed changes to the well design, as detailed in this letter; however, we will incorporate some of the suggested changes to the aquifer testing program. I'm assuming that formal changes to the workplan are not required to move forward with the well installation, but will await your approval.

We are trying to mobilize to drill this well by the end of Nov or early Dec, and have Boart Longyear tentatively scheduled to drill the well.

Please let me know if you have any questions. Thanks Jim
