---

On behalf of Cabot, Weston will be conducting the 1<sup>st</sup> Quarter 2009 groundwater sampling at the Cabot site beginning the week of 23 March 2009. In addition, the interceptor trench effectiveness investigation will also be performed during this week that will include the installation of 4 temporary wells east of the Cabot interceptor trench.

I apologize for the late notice; however, we wanted to coordinate both field activities in the same event. Our site lead during these activities will be Tara Rowland. Her mobile phone contact number is (919) 559-9487 if you plan to observe any of these activities.

Thanks,

Ralph
