Hi Stu:

Please share this information with Gregory Council and Mitch Browman about the need for extra fencing

Fred.

Mr. Murry:

Attached please see where Operations has indicated the need for gates. Also, please see where the northern most section of fence needs to be moved either to the east or west as it is shown going right down the middle of a retention pond.

Thank you,

Don Hambidge, PE
Assistant Director

Don,

I've attached a copy of Beazer's proposed fence line drawing with notes identifying areas that will require gates. Davy and Ed went out and performed a field inspection of the area and identified the locations where the fence contractor will need to install gates. These gates are necessary in order for us to have access to maintain the mowing of the rights-of-way and retention basins.

Thanks, Jerry

Jerry:

I don't believe that we have anything east of the proposed fence line that is indicated on the attachment; but, please take a look and make sure for me.

Thanks,

Don

Hello Mr. Murry,

The attached letter describes Beazer's proposed fence installation west of the former Koppers Site.

Please review this and let me know if you have any questions.

Thank you,
Greg
