Re: Local Implementation Team Participation in
Koppers Remedial Design/Remedial Action Efforts

Dear Dr. Mousa:

Thank you for the recent discussion related to Local Implementation Team (LIT) involvement in Koppers remedial design/remedial action work at the Cabot/Koppers Superfund Site (the Site). A question arose as to EPA's vision of how the LIT would interact in remedial design and remedial action efforts at the Site once a final consent decree for Koppers remedial design/remedial action is implemented.

EPA has appreciated and continues to appreciate the Local Implementation Team's participation in the technical working group at the Cabot/Koppers Superfund Site. The LIT has provided valuable feedback to the Agency that has shaped the remedy to date, and we respectfully request that the LIT continue to be allowed to do so. EPA will continue to provide workplans and implement LIT suggestions as well as include the LIT members in technical working group meetings, conference calls, and other Site efforts through the remedial design and remedial action phases of the work. We look forward to working with you through remedy design and implementation at the Site. If I may be of assistance, please contact me at (404) 562-9120 or via Internet e-mail at miller.scott@epa.gov.

Sincerely,

Scott Miller

Remedial Project Manager
