**Subject:** ACEPD Comments to Cabot FFS Interim Report  
**Date:** Thursday, January 21, 2016 10:36:00 AM

---

Rusty -

ACEPD generally supports and agrees with the January 20, 2016 comments provided to USEPA by GRU's technical team regarding the Cabot FFS Interim Report. We particularly support comment #1 regarding Cabot's proposed revised action levels for phenol and 3-,4-methyl phenol ; comment #13 regarding the need for remedial action within the proposed slurry wall and comment #23 regarding the need for additional data collection in the parking lot south of the Winn-Dixie store and east of the north – south section of the shopping center.

Thanks for the opportunity to provide comments.

Gus
