Subject: RE: EPA Comments on Supplemental Hawthorne Investigation
Date: Wednesday, June 27, 2007 12:36:00 PM

Scott,

ACEPD appreciates the opportunity to review the draft EPA comments on the Supplemental Hawthorne Investigation at the Koppers Superfund site. We generally agree with most of the comments. We do request that USEPA potentially consider the following additional comment on Item #7 of the draft EPA letter which requests sampling of additional existing Hawthorn wells in addition to the wells to be installed in this supplemental investigation. In particular,

1. ACEPD requests sampling of HG-5S and HG-2S in addition to the wells requested by USEPA in order to determine if these wells remain un-impacted by site contaminants. On-site, the upper Hawthorn Group sediments are the most highly contaminated portion of the intermediate aquifer, with "product" continuing to be removed from selected wells. ACEPD believes resampling of these wells would provide additional assurance about the assumption that the upper Hawthorn group in the vicinity of the western boundary in fact remains uncontaminated. These wells have not been sampled for several years.

If you have any additional comments or questions about our request you may contact Robin Hallbourg at 352-264-6825 or via e-mail.

Thanks

John Mousa
