Subject:	GRU & ACEPD Comments on ISGS Workplan
Date:	Friday, March 30, 2012 5:18:15 PM
Attachments:	GRU_ACEPD Response_to_Revised_ISGS_WP-March2012.docx

Scott,

Attached includes draft comments from GRU and ACEPD. Priority issues we would like to discuss at the conference call include

1. The need for LHG wells
2. The number and placement of UHG wells
3. Basis for not using flux meters
4. Discussion of lines of evidence that will be used to determine success of ISGS
5. Sample collection methodology for baseline monitoring
6. Avoidance of hydrofracturing & liquefaction

We look forward to our conference call next week.

Rick Hutton, P.E.
Supervising Utility Engineer
