Subject: RE: DEP Review- Koppers- Remedial Action Work Plan for blocks G and H
Date: Thursday, February 27, 2014 12:25:32 PM

Scott-

Thank you for the opportunity for DEP to review the February 21, 2014 Remedial Action Work Plan: Off-Property Soil Replacement Blocks G& H. The document is similar to the Remedial Action Work Plan (WP) for the Offsite Soil Replacement pilot project conducted recently at the site.

DEP review comments on the pilot removal WP (see November 12, 2013 email) are satisfactorily addressed in February 2014 Block G & H Work Plan, where applicable. We request clarification in the following areas as it relates to Blocks G & H:

- 1) The Work Plan text and Figure 2 do not indicate the status of parcels G02, G04, G06. DEP understands that EPA conducted additional soil sampling in February 2014 that was to include sampling in this area to determine if soil removal was necessary north of parcels G01, G03 and G05. When will the data be provided and how will the results be incorporated into the Work Plan and scope of removal if necessary.
- 2) Figure 3-2 (Parcel G03)- It does not appear that the northern half of the parcel is addressed by the removal or that there is pavement or other structures which would preclude a soil removal in that area. Please explain.
- 3) Backfill sampling data confirms that the proposed sources of backfill meet the Chapter 62-777 SCTLs based on the lab analysis provided. However, it does not appear that analysis included dioxin? Please provide.

We look forward to implementation of the offsite soil remedy.

Kelsey
