**Subject:** Re: FW: Issues of Dust Control and Proper Disposal of Contaminated Building Materials from Koppers Demolition

Kelsey,  
Beazer is working on a plan to address concerns there. There will be little demolition there as most of the buildings and machinery were removed from the Site.

Thanks,

Ashwin- Please see issue of dust control below. Are there criteria and monitoring that are required to ensure compliance during demolition of this RCRA facility? I may have missed something, but is there a schedule for demolition and written plan that has been provided to RCRA?

Thanks- Kelsey

Scott,

I want to bring to your attention a issue raised by the City of Gainesville concerning the plans if any that Beazer has for controlling dust generated during demolition of the structures at the Koppers site.

The City's permitting department has also raised questions about how potentially contaminated building materials are going to be handled.

They are asking to see a plan for these items or some feedback from Beazer on these items. These seem to be legitimate concerns that ACEPD would also like to see addressed

Fred Murry is probably also contacting you about this issue.
