Dr. Mousa,
We've not received the additional on-site soil sampling results. I have requested for AMEC to send those in. Will forward them as they become available.
Thanks,

Scott Miller

Subject: Results of Sampling in Nothern Inactive Area at Koppers

Scott,

In the August 19, 2009 response from Beazer to USEPA concerning USEPA's risk assessment questions, it is stated that sampling results have been obtained and shared with USEPA concerning the Northern Inactive Area of the Koppers site. The comment seems to indicate that this area has contamination with chemicals of interest. Since the sampling of this area has been a request of ACEPD to USEPA in the past, we would like to get the results of this sampling sent to ACEPD and other stakeholders.

John
