**Subject:** RE: Additional Proposed Koppers Off-site Soil Sampling Locations?  
**Date:** Tuesday, March 23, 2010 1:55:16 PM

---

Dear Ms. Wynn,

Additional off-site soil sampling is proposed in the neighborhood west of the Koppers property. There are proposed sampling sites west of #SS06AA and #SS07AA. The following link will take you to the study plan (Additional Off-Site Soil sampling – Western Grid Cabot/Koppers Superfund Site Gainesville, Florida) and map that shows the proposed additional sampling locations.

[https://govconnect.alachuacounty.us/sites/doc/epd/Cabot%20Koppers%20Documents/1658\\_AMEC%20Beazer%20Proposed%20Additional%20Offsite%20Grid%20Sampling%20Western%20Koppers%20Site%20-19-2010.pdf](https://govconnect.alachuacounty.us/sites/doc/epd/Cabot%20Koppers%20Documents/1658_AMEC%20Beazer%20Proposed%20Additional%20Offsite%20Grid%20Sampling%20Western%20Koppers%20Site%20-19-2010.pdf)

This document is located in our department's external document library for the Cabot/Koppers site with documents. Samples at the sites shown in the proposed plan will be collected at two intervals, 0 to 6-inches and 6 to 24 inches, with the deeper samples at most sites held pending analyses of samples from the shallower interval. This sampling plan is currently under review, so there may be changes. The map I sent to you on Friday shows the results for off-site soil samples taken at the 0 to 6-inch interval.

Please don't hesitate to contact us if you have further questions or have problems accessing the document.

Sincerely,

Robin Hallbourg  
Alachua County Environmental Protection Department  
352/264-6825

Subject: Additional Proposed Koppers Off-site Soil Sampling Locations?

Dear Robin, Anthony, John,

It appears as though Samples #SS06AA (.0000076) and #SS07AA(.0000239) are high. What is the proposed sampling further west of these test sites????? Is there a map of future proposed soil testing? What is the DEPTH of these soil samples, which could have a big impact on the results?

Thanks, Suzanne Wynn
