Hi Jeff - A couple of comments / questions:

Fact Sheet

Page 3 of 16, third paragraph – last sentence is repeated twice. **Ok, updated**

Page 4 of 16 , fourth paragraph – indicates that “air monitoring will be conducted”; you may want to specify what type of air monitoring, particulates? **Ok, updated**

Page 8 of 16 – suggest showing location of SWU-2 in Figure 1 **ok, yes this is being updated.**

Page 14 of 16 – paragraph (f) Irrigation and on-site water reuse; are they currently doing this? **No not at this time. They will need to submit a permit revision with details.**

Permit

Page 6, copper – “The compliance value shall not exceed **0.00**”, **is this correct? Yes, this calculates a comparison between the lab analysis value reported and the permit limit calculated based on hardness. So if the result is less that the limit, it is in compliance. This is a data processing procedure.**

Page 7, chromium – “The compliance value shall not exceed **0.00**”, **is this correct? Yes, this calculates a comparison between the lab analysis value reported and the permit limit calculated based on hardness. So if the result is less that the limit, it is in compliance. This is a data processing procedure.**

Administrative Order

Page 7, end of first paragraph – “The concentrations of total recoverable copper.....not exceeded Class III water quality standards for fresh water (Rule 62-302 FAC)”. My understanding is that this is after the remedial actions are completed , there are no limits in the interim; correct? Also, should “exceeded” be “exceed” ? **Yes, that sentence can be revised or removed since in the interim, they are sampling and reporting only. In the future, once final remedial actions have taken place, then they must meet 62-302 standards.**

Thanks,

Gus

Attached to this email is the **Draft Permit** for the project listed above.

Please note the following:

- If this is a Wastewater Facility **Final** Permit with Discharge Monitoring Report (DMR), please begin using the DMR beginning on **xx/xx/xxxx**
- The attached file can be opened by Adobe Reader, that can be downloaded from <http://get.adobe.com/reader/>
- **PLEASE ACKNOWLEDGE THE RECEIPT OF THIS EMAIL**, so we can be sure that you received it.
- If you have additional questions or would like to receive the document by fax/regular mail, please feel free to contact me.

Thank you.
