Subject: Re: Hawthorn Group Well Placement Discussion
Date: Thursday, August 30, 2007 4:14:52 PM

Scott and John, this email is to document our telephone conversation today concerning the proposed location of monitoring well HG-22D at the Gainesville Cabot Carbon/ Koppers Superfund site. Monitoring well HG-22D will be located in the City street approximately 100 feet to the west of the KI property fence and approximately aligned with the Geiersbach residence. If you have any additional questions concerning the location of this new HG monitoring well please call or email me.
Thanks Jim

Jim,
Greetings, we are concerned that there is a Hawthorn Group Well installation taking place that may deviate from the workplan approved. When can we discuss well placement for Hawthorn Group Well 22D?
Thanks,

Scott Miller
