Subject: Planned Gainesville Soil Sampling July 30-31
Date: Friday, July 19, 2013 3:30:32 PM
Attachments: [Figure 1 7-19-13.pdf](#)
[Figure 2 7-19-13.pdf](#)

Rusty,

Beazer East, Inc. intends to collect seventeen surface-soil samples for dioxin analysis on residential "evaluation parcels" west and south of the Beazer property on July 30-31, 2013. The purpose of the sampling is to determine whether these parcels have soil concentrations above the dioxin cleanup goal of 7 ng/kg.

Please see the attached maps of planned sample locations, subject to final field placement. We have received sampling access agreements from the owners of these parcels.

Please reply to confirm that EPA approves of this sampling.

Consistent with previous off-site sampling, final sampling locations will be selected in the field and EPA, FDEP, Alachua County and City of Gainesville are invited to review all locations prior to sampling (see details below). All sampling and analysis will be performed in accordance with the Off-Site Sampling Work Plan (AMEC, 2008) and the Quality Assurance Work Plan (Environmental Standards, 2009). All samples will be submitted for analysis by EPA Method 1613B.

As with prior sampling events, John Rice of AMEC will lead the Beazer sampling team, with Environmental Standards providing field QA. Those wishing to review sampling locations should meet John at 9:00 am on Tuesday, July 30, at the front gate of the Beazer property (200 NW 23rd Avenue).

Thank you,
Greg
