Scott- Thank you for your follow up with John. I'm fine with that re-wording. Obviously that does not mean that if we determine it is necessary that we would not recommend toxicity testing per the DEP guidance. But that can be looked at as part of an eco risk assessment. John, let me know if you have any questions. Thanks- Kelsey

The Department of Environmental

Protection values your feedback as a customer. DEP Secretary Michael W. Sole is committed to continuously assessing and

improving the level and quality of services provided to you. Please take a few minutes to comment on the quality of

service you received. Copy the url below to a web browser to complete the DEP

John,

Good morning, per your request, Kelsey and I spoke about these proposed changes to the ACEPD Response to FDEP Comments and I believe that we agreed on one wording change to comment #4 so that the proposed change would read as follows:

"Remediation/management of sediments in these locations is necessary to reduce environmental concerns in the entire study area unless an ecological risk assessment shows that these concentrations are not of concern"

Aside from that, EPA has no further requested changes and is comfortable with the proposed changes although as we discussed, we were particularly pleased with the objective nature of the original report.

I've cc:ed Kelsey to make sure that we are on the same page here related to the change to comment #4.

Thank you,

Scott Miller

ACEPD Response to FDEP Comments
on Springstead Creek Sediment
Study Received on August 4, 2009

Kelsey,

Attached is ACEPD's response to the FDEP comments on our Sediment Quality Report on Springstead and Hogtown Creek received on August 4, 2009. Let me know if you have any questions. If FDEP will have any comments on human health impacts of our report in the next week or so, I would appreciate getting them before I have to finalize the presentation on August 20.

Thanks for your review and comments.

John Mousa
