[Suspected Letters 3-4-11.docx](#)

---

Attached are example Offsite Contamination notice letters that will be mailed to property owners today based on results of the September 2010 Background soil sampling in commercial/industrial areas of Gainesville as part of the ongoing work related to the Koppers site. Background soil samples were collected on Rights of Way (ROW) at locations further than 1 mile from the Koppers site. The offsite notice letters are being issued by DEP as required by Chapter 62-780 where compounds are observed above Soil Cleanup Target Levels (SCTLs) for unrestricted use. The ROW property owner is being noticed of "confirmed" soil contamination and the owner of the property fronting the ROW sample location is being notice of "suspected" soil contamination based on ROW sample results. As stated in the notice letters, DEP does not have information that links these results to the site.

The Koppers Initial Notice letters will go out this Friday (March 4<sup>th</sup>). We will also be sending the 'background' letters out at the same time. Copies of the 'background' letters will be forwarded to you sometime today but they will not be mailed until tomorrow. Note that we will not have copies of the 'initial notice' letters until our hard copies are delivered, usually sometime Friday. However, we will have the lists of letter recipients and contaminants for which they are being notified in advance of that. I'm expecting the 'initial notice' letters file will be too large to comfortably e-mail so we can post on the FTP site for folks to download. Please let me know if you have any questions,  
Thanks,  
Brian
